

LARS KERKHOF

MSc Data Science in Business and Entrepreneurship

EXPERIENCE

Work student Accountancy

Joore | November 2023 - May 2024 | part-time

Part-time job where I worked in the compilation practice of Joore to carry out financial administration and assisted with creating financial statements.

Work student Data Analysis & AI

Steddion | May 2025 - Present | full-time/part-time

Currently, I am working at Steddion, a scale-up helping companies to solve complex energy situations, and enabling growth through energy.

- Built a real-time monitoring platform on InfluxDB + Grafana, handling high-volume time series data from distributed energy assets like BESS, solar inverters and grid meters. Includes anomaly detection and live insights for energy asset management.
- Developed EMS QuickScan: a React-based scoring tool, with Airtable as back-end to categorize and display capabilities of Energy Management Systems.
- Delivered client-facing energy reports analysing complex energy situations to deliver recommendations to optimize the energy costs and/or sustainability goals of clients.

PERSONAL INFORMATION

22-year old data science master's student with hands-on experience building real-time monitoring and data pipelines for distributed energy assets. Strong in Python and ML/DL, including computer vision, with applied knowledge of battery/energy systems. Keen to bring data-driven, energy-aware decision-making to autonomous robotics, with a deep interest in deeptech, energy, and start-ups.

NON-TECHNICAL SKILLS

Keen learner: I am broadly interested and eager to learn from all facets of life. This is shown by my interest in philosophy, business and datascience. It is further exemplified by my exchange at HEC Montréal.

Energy and batteries: Knowledge about the workings of batteries/BESS, solar energy and how energy management algorithms work.

English: Fluent English, proven by a C2 Cambridge certificate.

TECHNICAL SKILLS

Programming Languages: Python, R and SQL.

Data Engineering: GCP, Apache Kafka & Spark, Docker, InfluxDB

Data Science: Jupyter, Pandas, TensorFlow, PyTorch, OpenCV, Grafana

Others: Git, HuggingFace

INTERESTS

Outside of my education and work I like to stay fit, play chess, travel and engage in social activities with friends and family.

EDUCATION

Data Science in Business and Entrepreneurship

Jheronimus Academy of Data Science | 2025 - Present

Currently, I am enrolled in a 2-year master program, with courses in statistics, machine/deep learning, data engineering and optimization. For my electives I am pursuing a double specialization 'data science' and 'data engineering'.

International Business Administration

Tilburg University | 2021 - 2025

Completed my bachelor International Business Administration at Tilburg University. During this bachelor I followed a minor in data science and I was active at study association Asset | IB&M.

Philosophy

Tilburg University | 2021 - 2022

Parallel to my bachelor IBA I did one year of philosophy to develop my own interests, broaden my worldview and develop critical thinking skills.

Exchange minor Business Administration

HEC Montréal | January 2025 - May 2025

During an exchange semester in Canada I completed courses related to my bachelor and enjoyed the cultural exchange.

Gymnasium Beekvliet

2015-2021
